

URBANGRID
A U S T R A L I A

Health, Safety & Environment Policy

UrbanGrid Australia has a strong and uncompromising commitment to providing a safe and healthy working environment for all personnel, contractors, visitors and public, whilst minimising our impact on the environment. UrbanGrid Australia has a documented Health, Safety and Environmental Management System which is integrated into all organisational activities and services.

UrbanGrid Australia is committed to improving health, safety and environmental performance:

- Establishing and monitoring measurable health, safety and environmental objectives and targets
- Providing adequate and appropriate resources in order to meet health, safety and environmental objectives and targets
- Continually seeking ways to reduce our carbon foot print and embrace the reduce, reuse and recycle principal
- Communicating health and safety roles, responsibilities and accountability to all personnel, contractors and responsible persons
- Adhering to and complying with all relevant safety, health and environmental legislation, ISO and AS/NZ Standards, Codes of Practice and organisational performance requirements
- Engaging in communication and consultation with personnel, clients and sub-contractors in the implementation and continuous improvement of the Health, Safety and Environmental Management System and its programs
- Establishing programs to eliminate work-related injury and illness
- Training in hazard identification and risk management in all aspects of the organisation's operations
- Maintaining and reviewing the Health, Safety and Environmental Management System to ensure it accurately reflects UrbanGrid Australia's operations
